

Western Blot Stripping

Buffer Needed:

Stripping Buffer

2% SDS
100 mM beta-mercaptoethanol
50 mM Tris, pH 6.8

Procedure:

1. Heat stripping buffer to 50° C in water bath
2. Incubate blot with stripping buffer at 50° for 15 to 30 minutes with shaking
3. Rinse blot multiple times in TBS
4. Block and blot as normal
