</table>

**Air**
- expansion and compression
  - compression [130]
  - expansion [130]
  - horsepower to compress [132-133]
- isothermal work to compress [131]
- flow in pipes [130]
- gage pressure [131-135]
- power or work to compress [131-135]
- pressure, temperature, and volume relationships [130]
- velocity of escaping [131]
- volume and weight at different temperatures [131]
- volume transmitted through pipes [131]

**AISI-SAE**
- alloy steels
  - carbon steels [29]
  - expressions and formulas [29]
  - rearrangement and transposition of terms [29]
  - allowances and tolerances
    - allowance defined [445, 584]
    - allowance for forced fits [451]
    - application [451]
    - bending sheet metal [414, 1312, 1313]
    - cylindrical fits, ANSI Standard for [584, 581]
    - fits [451, 584, 581]
    - metric ISO, British Standard for [579, 578]
    - preferred series [579]
      - unilateral and bilateral tolerances [579]
  - Alloy cast iron [505]
  - Alloy steels [510]
  - AISI-SAE Designations
    - basic numbering system [441, 144, 142, 451, 422, 484]
    - carburizing grades [451, 484, 422, 484]
    - cast composition directly hardenable grades [451, 484, 422, 484]
    - effects of alloying elements on electrodes (welding) [484]
    - current to use with [484]
    - elongation of forged and rolled gears [414]
    - hardness of heat-treated heat treatments [484]
    - mechanical properties [484]
      - milling [581, 582]
      - numbering system [581, 582]
      - strength of heat-treated [581, 582]

**Alloy steels**
- tensile strength [2844]
- turning [292, 291]

**Alloys**
- aluminum alloys
  - anodizing characteristics [284]
  - chemical composition [278, 279, 279]
  - electrical conductivity [279]
  - elongation [279, 279, 279]
  - high corrosion resistance [279]
  - mechanical properties [279]
  - temper [279, 279, 279]
  - ultimate tensile strength [279]
  - workability [279]
  - yield strength [279, 279, 279]

- Association bearing material data [292, 292]
- cast composition characteristics of cladding alloys [278, 279, 279]
- coefficient of expansion [284]
- density [284]
- die casting [284]
- elongation [284, 284]
- heat treatability of wrought material [284]
- melting point [284]
- modulus of elasticity [284]
- specific heat [284]
- structural shapes [284]
- temper designation [279, 279, 279]
- tensile strength [284]
- thermal conductivity [284]
- welding [284]
- wrought yield strength [284]

**American Boiler Makers Association** [292]

## Bearings

### (continued)

**roller**
- friction losses in 2304
- handling precautions 2304
- high speed effects 2313
- housing bore tolerances 2254, 2258
- housings, soft metal and resilient 2290
- internal clearance 2314
- life 2257, 2258
- adjustment factors, for application 2318
- for material 2318
- criterion 2307
- life adjustment factors 2318
- load ratings 2307
- location and seating 2294–2302
- locknuts and shafts 2299–2301
- lockwashers 2298
- lubrication 2304, 2313
- materials for 2277, 2313
- method of designation 2288–2289
- mounting 2294, 2304
- precautions 2297
- type 2297
- needle type 2291–2293
- pillow block 2277
- plastics 2274
- quiet or vibration-free mountings 2297
- radial 2315
- radial and axial clearance 2305
- radial load 2316
- rating life 2274, 2275
- reliability 2298
- selection 2297
- self-aligning 2274
- shaft and housing fits for 2297
- metric radial 2289, 2291
- soft metal and resilient housings 2297
- special or unconventional types of 2297
- spherical roller 2274
- spherical type 2274
- squareness and alignment 2290
- static equivalent loads 2282, 2283
- static load criterion 2246
- stress concentrations 2246
- symbols 2259
- tapered 2273
- tapered roller thrust type 2273
- thrust 2273
- tolerances for 2283, 2289
- torque, starting 2256
- types of 2273, 2291
- roller thrust
- spherical roller 2274
- sleeve 2279
- spacing and shaft stiffness 2086
- tapered
- land thrust bearing 2248, 2254, 2256
- roller bearings 2273

**tapered**
- roller thrust bearings 2273
- thrust bearing 2297, 2298

### INDEX

#### Bolts and nuts (continued)

- **Combination** [1580]
- **Counterbore sizes** [887, 1557]
- **Countersinking** [1579]
- **Deflection** [1495]
- **Designation** [1580]
- **Diameter-length combinations** [1552]
- **Drill sizes** [1558]
- **Elongation and tightening tension** [1495]
- **Elongation measurements** [1500]
- **Eye bolts and nuts** [394–395]
- **Finish** [1578]
- **Friction coefficient** [1498]
- **Friction coefficients** [1498]
- **Grade markings for steel** [1508]
- **Hexagonal bolts, screws, and nuts** [1578]
- **Hexagonal sockets** [1560]
- **Identification symbols** [1551]
- **Length of thread** [1579]
- **Load allowable on bolts** [1509]
- **Loaded joints** [1496]
- **Marking** [1580]
- **Materials properties** [1508]
- **Metric hex bolts** [1550]
- **Metric hex cap screws** [1553]
- **Metric hex flange nuts** [1564]
- **Metric hex lag screws** [1562]
- **Metric round head bolts** [1551]
- **Metric screw** [1551]
- **Nominal lengths** [1578]
- **Preload adjustments** [1496]
- **Application methods** [1500]
- **Applications** [1497]
- **Loaded joints** [1499]
- **Shear** [1497]
- **Proof strength** [1495]
- **Relaxation of preloads** [1495]
- **Round head neck bolts** [1526]
- **Socket head cap screws** [1552]
- **Spacing for wrench clearances** [1530–1531]
- **Spline sockets** [1560]
- **Square** [1513]
- **Steel nuts** [1580]
- **Strength grade designations** [1508–1509, 1550–1551, 1561–1566, 1579–1580]
- **Tightening** [1495]
- **Torque** [1495]
- **Torque prevailing types** [1564]
- **Torque required to tighten** [1495]
- **Unified square** [747]
- **Unified Standard** [747]
- **Washer facing** [1579]

#### Bolts and nuts (continued)

- **Working strength of bolts** [1507]
- **Wrench and socket clearances** [1504]
- **Wrench clearances for nuts** [1504]
- **Wrench openings** [1504]
- **Yield strength** [1495]
- **Bonding, adhesives** [1495]

#### Boring

- **Carbide tools for** [887–888]
- **Cutting time for** [1033]
- **Insert holder** [762–764]
- **Boring machine, origin** [891]

#### Boring tools

- **Carbide carbide tipped round** [887–888]
- **Cutting tool materials** [1013–1017, 1178, 1195, 1204]
- **Drilling and reaming** [1072]
- **Drilling and reaming** [1060–1066]
- **Speeds and feeds** [1033–1039]
- **Wrought iron** [1060–1066]

#### Brass and bronze

- **Alloys** [553–577]
- **Cast iron** [560–568]
- **Drilling and reaming** [1072]
- **Drilling and reaming** [1060–1066]
- **Wrought iron** [1060–1066]
- **Speeds and feeds** [1033–1039]
- **Turning** [1084–1086]

#### Brass files

- **Drill** [1355–1356]

#### Brazing

- **Blowpipe** [1348, 1349]
- **Dip** [1354]
- **Filler metals for** [1364]
- **Fluxes for** [1348]
- **Furnace** [1351–1353]
- **Heating for** [1354]
- **Induction** [1354]
- **Methods** [1354]
- **Resistance** [1354]
- **Symbols** [1354]
- **Vacuum furnace** [1354]

#### Brakes

- **Band** [1384–1385]
- **Block type** [1384–1385]
- **Coefficient of friction** [1384–1385]

#### Brass files

- **Blowpipe** [1348, 1349]
- **Dip** [1354]
- **Filler metals for** [1364]
- **Fluxes for** [1348]
- **Furnace** [1351–1353]
- **Heating for** [1354]
- **Induction** [1354]
- **Methods** [1354]
- **Resistance** [1354]
- **Symbols** [1354]
- **Vacuum furnace** [1354]

Diametral pitch
  definition 2016
  equivalent circular pitch and tooth proportions 2016
  metric modules and circular pitch 212

Diametral pitch knurls, (ANSI) Standard 212

Diamond
  built up edge concentration 281
  cratering 783
  designation symbols 220
  diamond concentration feeds and speeds 220
  grades, grit sizes 221–222
  modifications 220
  operating guidelines for operations and handling 220
  selection of shapes of standard speed and feeds 220
  terminology 220
  thread grinding work speeds 220

Die casting
  alloys 1371–1374
  bearing metals 1373
  dies machines 1373
  files 1373
  injection molding machining zinc alloys 1374
  porosity 1374
  skin effect 1374

Dielectric strength
  ceramics 145
  plastics 145

Die-maker's reamers 222

Dies and taps
  combination drill and tap maximum pitches 104
  square thread tap drill size 104
  Acme thread formula 100
  metric 102
  pipe 100
  Unified 102

Dies, sheet metal bending允许 132, 133
Drilling (continued)

cutting speeds for
ferrous cast metals 1068, 1069
light metal 1068
superalloys 1068

titanium and titanium alloys 1069
tool steels 1069
difficulties 1069
estimating thrust, torque, and
power 1069
feed factors 1069
holes in glass 1069
horsepower and thrust for
machine, shaftless motor type 1090

Drills
accuracy of drilled holes 891
and countersink plain types 873
and countersinks, bell types 873
angle of cutting point 968
ANSI Standards 854
chucks, tapers 939

cobalt high-speed steel 885
combined drills and countersinks 872

core, taper shank 874
counterbores 854
cutting speeds and equivalent rpm 1017
definitions of terms 854
diameter factors, thrust 1091
diameter factors, torque 1091
diameters of tap 1932
driver, collet type 878
drivers 879
for taper pin reamers 1877
grinding 969
jobbers length 1868
length of point 877
metric, British Standard 854
nomenclature 854
screw machine drills 568, 1770
sharping 1868
sizes for tapping 1868
for Acme threads 1869
sizes for tapping Acme threads 1869
spades 879
specifications 857
steels for 854
straight shank 874
straight-shank, drill sizes

core drills 870
cutting speeds for 870
light metal 870
superalloys 870
titanium and titanium alloys 870
tool steels 870
difficulties 870
estimating thrust, torque, and
power 870
feed factors 870
holes in glass 870
horsepower and thrust for
machine, shaftless motor type 1090

Drills (continued)
straight-shank, taper-length, drill sizes
metric 837, 861
number 837, 861
screw machine length 867
tangs for 865
tap and clearance hole sizes 891
taper shank 837
taper-shank drill sizes
fractional inch 868, 874
metric 868, 874

terms 859

Drives
nose key screws 1643
square, for portable tools 1681
for taper 1654

Drums, chain and wire rope 378

Dry seal pipe threads 1866
assembly limitations 1866
designations 1868

diameter pitch combinations 1868
taps for 901
types 1866

Ductile
cast iron 1361
iron 474

Durametall, machining 1155

Durometer tests 551

eccentricity 2165

Echols thread 1891

economic tool-life 1110

Dynamic balance 283
stresses 283

Dynamic factor 839

Dynamic factor 1351

Edy 548

Edx 548

Eccentricity 1765

Edm 856

capacitor 835
craters 835

- metal arc welding (GMAW) [G107]  
- specific gravity [G107]  
- specific heat [G107]  
- stainless steel welding (TIG) [G1079]

### G-code programming, NC
- involute [G028], [G027]  
- milling cutters for chain sprockets [G019]  
- 14.5 deg pressure angles [G216], [G217]  
- number for bevel gears [G029], [G029]

### Gear cutters, formed
- involute [G028], [G027]  
- chain sprockets [G17], [G18]  
- 14.5 deg pressure angles [G216]  
- number for bevel gears [G029], [G029]

### Gear cutting
- block or multiple indexing [G023], [G023]  
- excess depth to obtain backlash [G2089]  
- formed cutter selection [G028], [G028]

### Gearing materials
- effect of alloying metals [G128]  
- chrome-molybdenum [G128]  
- chrome-nickel [G128]  
- chrome-vanadium [G128]  
- manganese [G128]  
- molybdenum [G128]  
- nickel [G128]  
- nickel-molybdenum [G128]  
- vanadium [G128]  
- forged and rolled [G128]  
- alloy steels [G128]  
- carbon steels [G128]  
- non metallic [G128]

### Gear cutting
- application [G128]  
- bore sizes [G128]  
- diametral pitch for given power [G128]  
- diametral pitch for given torque [G128]  
- mating gear [G128]  
- power transmitting capacity [G128]  
- preferred pitch [G128]  
- safe working stress [G128]  

### Gearing materials (continued)
- non metallic [G130]  
- tooth form [G130]  
- sintered materials [G113]  
- steel castings [G107]  

### Gears and gearing
- active face width [G027]  
- active spline length [G113]  
- actual safety factor [G027]  
- actual space width [G113]  
- actual tooth thickness [G113]  
- AGMA Standards [G027], [G027]  
- angular backlash [G027]  
- arc of action [G027]  
- of approach [G027]  
- of recession [G027]  
- thickness of internal gear tooth [G027]  
- thickness of pinion tooth [G027]  
- axial pitch plan sets [G027]  
- axial thickness [G027]  
- backslash [G027]  
- angular backlash [G027]  
- recommended [G027]  
- bearing spacing and shaft stiffness [G028]

### Bevel gears, angulations
- design of [G028]  
- for fine pitch gears [G028]  
- bottom land [G028]  
- for bronze and brass castings for [G126]  
- bulk temperature thermal flash factor [G027]  
- bushings for gears [G028]

### Calculating
- calculated safety factors [G027]  
- calculating dimensions of milled bevel gears [G028]  
- replacement gear dimensions [G113]  
- spur gear proportions [G028]  
- case hardening steels for [G113]  
- change gears, for lathe checking [G016]  
- gear sizes [G128]  
- pressures [G027]  
- spur gear sizes [G128]  
- chordal measurement of teeth [G128]  
- circular pitch system [G128]  
- coefficient of friction [G207]  
- contact ratio factor [G028]  
- crossed helical [G028]  
- deburring tooth profile [G028]  
- design of bevel gear blanks [G028]  
- diametral pitch definition [G028]  
- preferred system [G028]

### Differential indexing ratio [G028]

### INDEX

**Weight**
- nails and spikes 427
- per feet of wood 427
- pipe, per foot 253
- solid fuels 425
- steel S-sections 251
- water 172

**Wood**
- of natural piles 409
- per feet of wood 412

**Weldability**
- HSLA steels 463

**Welding**
- (continued)
  - aluminum 411
  - ANSI welding symbols 411
  - application of nondestructive testing 412
  - arc cutting of metals with electric arc 410
  - with lasers 411
  - definitions and symbols designations 410
  - duct welds 411
  - electrodes 412
  - AWS E60XX 409
  - AWS E70XX 409
